PRØDUCT CATÄLØG
2022–2023

VIKING®

THE VIKING BRAND HAS THE LONGEST AND MOST SUCCESSFUL HERITAGE OF GRASS ROOTS PROMOTIONS AND GAME CHANGING PRODUCT INTRODUCTIONS IN PLATFORM TENNIS.

Today, Viking is recognized as a leader in the sport and continues to play an active role in driving the growth of the sport and development of new product innovations that make the game more enjoyable to play. Since the game's inception, players at all levels have consistently chosen Viking products including paddles, gloves, bags, backpacks, eyewear and balls. Viking is one of the few brands fortunate enough to be synonymous with the sport for which it manufactures products and the "Helmet & Horns" logo is the most recognizable brand in the platform tennis world.

RULË THE CØURT.™

PÄDDLE ØVERVIEW

Viking has been a leader in producing high performance platform paddles and equipment for almost thirty years. During this time, Viking has continued to use advanced engineering and the finest materials combined with revolutionary technologies taking our paddles to a whole new level and separating us from the rest of the field.

GRÏT

After extensive testing, we equipped all of this year's models with the ideal size and density grit, which allows players to experience extreme durability and control under any weather conditions.

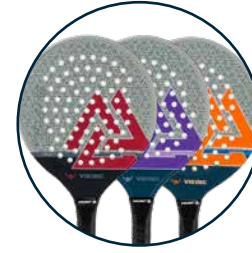

VIBRATION DAMPENER

Soft Elastomeric material positioned in the throat area featured on all our Prodigy models absorbs shock on ball impact, reducing arm fatigue and injury.

EXTRA HØLES

Extra holes up to the maximum allowable limit, provides more ball bite for extra spin and control while enhancing aerodynamics and reducing paddle weight for ultimate maneuverability.

PRØDIGY LINE-UP

The lightest models within each paddle family. The best of Viking's technologies all come together in the Prodigy models for unsurpassed maneuverability and stability.

GRIT GÜARD

A small, smooth plate above the handle on either side of the paddle face, minimizes players' direct contact with grit.

Pro Models

Our Pro Models are the heaviest ones in each line-up and feature the hardest core (Mid +). The harder the core, the less far will the ball travel upon contact. Think of a hard core as the equivalent of a tight string tension for a tennis racquet. Many mistakenly think that a harder core offers “less power and more control” but that is not true. You don’t have “less power and more control” with a harder core paddle but rather the ball travels less upon contact because the tighter the core of the paddle, the less steep the angle at which the ball leaves the paddle is and it produces less of a slingshot effect of all our models.

Lite Models

Our Lite Models are lighter than the Pro models, heavier than the Prodigies, and have a Mid core. Slightly better maneuverability compared than the Pro models due to the lower weight. Medium slingshot effect upon contact.

Prodigy Models

Our Prodigy Models are the lightest models within each paddle family. The best of Viking’s technologies all come together in the Prodigy models for unsurpassed maneuverability and stability. Each Prodigy model features extra holes up to the maximum allowable limit which provide more ball bite for extra spin and control while enhancing aerodynamics and reducing paddle weight for ultimate maneuverability. All come with standard vibration dampeners on the side to reduce vibration at contact. Made with a Soft core which produces the most slingshot effect of all our models.

THE CARBØN FIBER ADVANTAGE

The most refined and elegant qualities that you would expect in an outstanding player's paddle come together thanks to our new "Carbon Fiber Stability System" (CFS²) technology: optimal blend of control, power, maneuverability, and whippy feel for enhanced paddle head speed. The CFS² softens the response at impact and stability and maneuverability coexist seamlessly. **All our 2022-23 Valknut line-up paddles are made with the CFS² technology.**

Drives and Lobs

A tasteful balance of qualities: easy power, spin and control are all abundantly present, but not in excessive amounts. Whether you are looking to roll the ball in, block it back, or take an aggressive cut, the CFS² paddle is the perfect tool for the job thanks to the easy acceleration and outstanding feel.

You can groove your drive game without fear of over-hitting, and the nice soft and fluid feel at impact will result in the most consistent lobbing experience.

Overheads

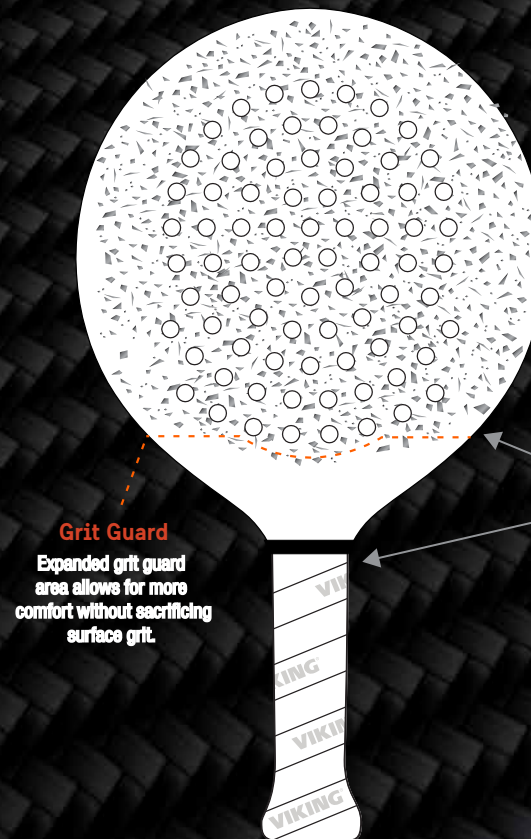

For spin overheads, those who want to produce those high-end specialty shots will find that there is enough mass in the paddle head to help knife the ball and keep it low.

Volleys

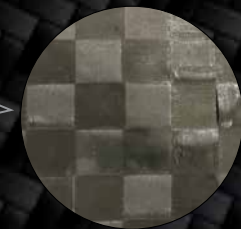

The CFS² finds the sweet spot between maneuverable and stable. Our proprietary technology will offer players what is probably the most sought after volleying advantage: increased ability to diffuse pace off incoming drives due to the paddle's near perfect stability at contact.

Serve

Effortless power controlled by spin that will bring the ball in – all thanks to the racquet's superb feel through contact and follow-through. It will never feel heavy or sluggish through the strike zone.

Grit Guard
Expanded grit guard area allows for more comfort without sacrificing surface grit.

CFS² CARBØN FIBER STABILITY

Carbon fiber weave wraps the entire throat of the paddle, giving it added stability and increased shock reduction without adding any weight.

RE-IGNITE

Ideal for players who are looking primarily for power, a bigger sweet spot, and stability. All new models feature our Carbon Fiber Stability System.

REIGNITE SPECIFICATIONS

- Weight (385g, 370g, 355g)
- New performance hybrid material
- Two sided Viking graphics
- Core density among the three models: mid+, mid, low
- Largest headsize within the line-up (92 sq.in.)
